Art Unit:

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States, or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 1-4, 7, 13 and 18- 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Fitch (5,912,653).

Fitch discloses an apparel for a wearer comprising: jacket; an electronic display associated with the jacket; a memory; a control member; selection member; and an input means.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 5, 6, 8-12, 14-17, 22-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fitch.

Art Unit:

The display system of Fitch's invention obviously can be able to generate a static image, dynamic image, a monochromatic image, alphanumeric characters because the display system is a color TV display device.

Fitch further teaches the display system can mounted on any wearable article other than the jacket (col. 5, lines 41-47). Therefore, it would have been obvious to one of ordinary skill in the art to mount Fitch's display system on a vest, cap, tie, suspenders, or belt.

5. Claims 28-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Brucker et al. (4,487,583).

Brucker discloses apparatus for playing a war game comprising: a garment; an electronic display form on the garment; a controller; a gun; and a sensor.
